Objective

Motivated Artificial Intelligence and Data Science student with a strong interest in AI Agents, Large Language Models (LLMs), Automation, Web Development, and Full-Stack Engineering. Experienced in developing AI-powered applications, machine learning projects, and web-based solutions using Python, JavaScript, and SQL. Seeking opportunities to contribute to intelligent software systems by combining AI, automation, and modern development practices to solve real-world problems and drive innovation.

Education

- **Dr. N.G.P Institute of Technology - Coimbatore, TN | UG - 2027**

Bachelor of Technology (Artificial Intelligence and Data Science Graduate) – 7.7 CGPA

- **ELGI Matric Higher Secondary School - Coimbatore, TN | HSC - 2023 – 83%**

- **ELGI Matric Higher Secondary School - Coimbatore, TN | SSLC - 2021 - Pass – 88%**

Projects

- **AI-Powered Employee Tracking and Attendance Monitoring System:** Developed a multi-camera surveillance system using YOLO, SAM, OpenCV, Face Recognition, ByteTrack, and RTSP streams for employee tracking, automated attendance, and workforce analytics.
- **SmartDB Assistant – AI Database Chatbot:** Built an LLM-powered database assistant that enables users to query MySQL databases using natural language. Integrated AI-driven SQL generation, schema-aware querying, and real-time database connectivity to provide accurate and context-aware responses through a web interface.
- **Object Detection with Voice for Blind Navigation:** An Android application that helps blind navigate in real time using the mobile camera and announces their names and distance through voice feedback.
- **AI Image Accuracy Finder — Pixel & Semantic Similarity Evaluation:** Developed a web-based system to evaluate and rank images against reference images using pixel-level comparison (Pixel Match) and semantic similarity (OpenAI CLIP). Built a Node.js + Python architecture with a persistent CLIP server to enable fast, automated image accuracy scoring and leaderboard generation.

- **Farmer to Market (Agro Based) Application:** Developing a mobile-based platform that connects farmers directly with consumers and retailers, eliminating middlemen. Integrated AI-based price prediction to ensure fair pricing, transparent transactions, and improved farmer income.
-

Experience & Internships

1. AI ENGINEER INTERN | TEXA Innovates - Coimbatore, India | April 2026

- Developed an AI-powered employee tracking and attendance monitoring system using YOLO, OpenCV, and RTSP camera streams.
- Built SmartDB Assistant, an LLM-powered chatbot for natural language interaction with databases.

2. DATA ANALYST INTERN | I-Bacus Tech Solutions - Coimbatore, India | June 2025

- Developed and maintained Power BI and Tableau dashboards to track KPI's.
- Assisted in data analysis, reporting, and documentation for business insights.
- Prepared structured data summaries and visual reports for stakeholder presentations.

3. GRAPHICAL DESIGNING INTERN | Visaiathalam Academy & Solutions | May 2024

- Designed marketing creatives includes logos, banners, and brochures.
 - Ensured visual and brand consistency across all digital and print materials.
 - Created social media content to enhance brand visibility and engagement.
-

Skills

- **Programming & Querying:** Python, Java, JavaScript, SQL
 - **AI & Machine Learning:** LLMs, Computer Vision, YOLO, OpenCV, Face Recognition, CLIP
 - **Web & Backend:** HTML, CSS, JavaScript, FastAPI
 - **Analytics & Visualization:** Power BI, Tableau, Excel
 - **Tools:** Git, GitHub
-

Certifications

- GenAI – Powered Data Analytics Job Simulation- Tata (Forage)
 - Introduction to HCL – NPTEL (Elite + Gold)
 - Design and Implementation of Human Computer Interfaces – NPTEL (Elite)
 - 3 months Graphical Designing Crash Course
-

Leadership & Responsibilities

- Event Coordinator – Prompt Battle & Paper Presentation
- College Basketball Team Vice Captain
